**Portfolio:** origamistudio.sk

### Bio

**Date of birth:** 13.04.2001 **Address:** Podhradiskom 76, 01004, ZA

My name is Adam, I was born in Piestany, but I currently live in Žilina. I've been interested in information technology since I was a kid and I've always been a science enthusiast. After graduating from high school I found my passion in design besides programming. This was awakened in me by reading an autobiography about Johnatan Ive, the head product designer at Apple. His story and ideas intrigued me so much that I also wanted to become a designer, (with a plot twist) specializing on digital products. As a self-taught designer, I landed my first internship as a web developer, where I gradually started to specialize more and more in UX and UI design. Alongside the internship, I kicked off my freelance career and now after years of experience, I'm looking ahead to a next, knowledge enhancing, job opportunity.

### Education

#### **Spojená škola informačných technológií v Kysuckom Novom Meste**

Informačné a sieťové technológie (2016 - 2020)

#### **Univerzita sv. Cyrila a Metoda v Trnave**

Bakalárske štúdium - Teória digitálnych hier (2020 - 2023)

### Experience

#### **Freelance Designer, GAMI5 s.r.o. (2019 - 2022)**

The main job of a freelance designer at Jaspravim.sk portal was to create UI designs for clients, complete UX/UI solutions for companies, UX reviews and simple testing. Among other things, the job helped me gain confidence in professional communication with clients and also expanded my range of references. I have reached the highest level of "Master Seller" with 100% positive reviews on this web service.

#### **Web Developer, Qualtec s.r.o. (2019 - 2020)**

My long-term work placement at Qualtec gave me a wide range of experience in web development, marketing, SEO, speed web optimization and copywriting. I have been involved in the development of several web projects, but the most famous is definitely the e-commerce store Dizajnovobaterie.sk attracting hundreds of customers daily.

#### **UI/UX Designer, Qualtec Studio s.r.o. (2020 - 2022)**

After two years of practice, I started to specialize more in the design aspect of web and app development. I started working independently on projects under the Qualtec Design. The scope of my work was the complete UX/UI process from communication to design to delivering the output. During my internship I worked on smaller projects such as redesigning the landing page of Cityzen.sk eshop or designing the interface of a POS terminal, as well as larger projects such as Transporea.com or Ulendy.com.

### Languages

**Slovak Language** Native  
**English Language** B2 Upper Intermediate

**Driver's License**    **B** - Personal Vehicle

**Soft Skills**    I would definitely rank creative problem solving, curiosity and critical thinking among my greatest strengths in soft skills. In addition, I know how to listen conscientiously and communicate professionally. I can work autonomously and conscientiously. I work diligently to manage stressful situations.

**Hobbies**    After passionately designing my ideas, the biggest hobby is bodybuilding, which I have been doing for about 5 years. Other than that, in my free time I create computer games and spend time with loved ones. I enjoy reading motivational literature, coffee and roller-skating.
